

Full-Stack Software Engineer with experience building scalable, user-focused web applications. Delivers reusable UI systems and production features that improve development efficiency and user experience. Collaborates in Agile teams to translate requirements into maintainable solutions. Open to relocation.

Professional Experience

Junior Software Engineer — Mean Guppy — Buffalo, NY Jun 2024 - Present

- Build reusable TypeScript and SASS-based design system components used across enterprise-scale applications, standardizing UI patterns and improving development efficiency.
- Improve application stability by implementing comprehensive unit and component testing with Vitest and React Testing Library, reducing regressions in production workflows.
- Built a Payload CMS + React-based content platform with custom component architecture to support enterprise-scale website re-authoring and migration for a Fortune 500 company, powering hundreds of pages.
- Implement frontend data layers and API integrations to manage asynchronous requests and structured response handling, enabling reliable dynamic UI rendering.

Technology Intern — M&T Bank — Buffalo, NY Jun 2023 - Aug 2023

- Developed a TypeScript and React web application connecting women of color in Buffalo with financial advisors, improving access to financial guidance and support resources.
- Implemented Cypress end-to-end tests and YAML-based CI/CD pipelines to ensure reliable, production-ready deployments.
- Collaborated in a Scrum-based Agile team through sprint planning, stand-ups, and retrospectives.
- Contributed to a research study comparing AI-generated and human-written code, maintaining weekly logs and documenting findings.

Cashier/Sales Associate — Stewart's Shops — Ballston Lake, NY Jun 2021 - Aug 2022

Education

Bachelor of Science: Computer Science — University at Buffalo, State University of New York Aug 2020 - May 2024

- Cum Laude (3.4/4.0 GPA), Dean's List (2021), Pride of New York Scholarship Recipient
- 8× MAC All-Academic Team, NCAA Division I Athlete (Cross Country & Track & Field)

High School Diploma — Burnt Hills-Ballston Lake High School Sep 2016 - Jun 2020

Skills

Programming Languages: Java, Python, Go, Scala, JavaScript, TypeScript, SQL

Tools & Platforms: React, HTML, CSS/SCSS, Next.js, Storybook, Cypress, Vitest, GitHub, GitLab, Postman, Jira, CMS, Figma, YAML, Cursor, GitHub Copilot

Projects

Real Weather App Feb 2026

- Developed a weather application using .NET MAUI (.NET 8) and C#, integrating real-time data from the OpenWeather API, with user-provided API key input for secure local configuration.
- Architected and built an ASP.NET backend to manage API requests and streamline data processing, improving performance and scalability.
- Implemented asynchronous data fetching and error handling to ensure responsive performance and reliable weather updates across devices in a locally hosted environment.

CRUD Notes Mar 2026

- Architected and managed a SQLite database to support full CRUD functionality in a Flask-based web application.
- Wrote and executed SQL queries to handle data insertion, updates, deletion, and retrieval.
- Established database connections within Flask routes to ensure reliable transaction handling.
- Maintained data integrity through structured schema design and controlled query execution.

Personal Website — <https://wmarchant13.github.io/personal-website/> Dec 2025 - Jan 2026

- Built a responsive, performance-optimized portfolio website using React, Next.js, Bun, TypeScript, and SCSS.
- Implemented a YAML CI pipeline for automated, semantically versioned releases and changelog updates.
- Leveraged AI tools such as Cursor and GitHub Copilot to accelerate development.
